

CASTORIA

for Infants and Children.

Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have paregoric or laudanum to make it sleep. These drugs will produce sleep, and a few drops too many will produce the sleep from which there is no waking. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody, without labeling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. Castoria does not contain narcotics.

The signature of *Dr. J. C. Fletcher* guarantees genuine Castoria. Physicians Recommend Castoria.

"I have frequently prescribed Castoria for common ailments of children with good results." W. A. CHANDLER, M. D., Buffalo, N. Y.

"As the father of thirteen children I certainly know something about your great medicine and, aside from my own family experience, I have, in my years of practice, found Castoria a popular and efficient remedy in almost every home." Wm. J. McCRACKEN, M. D., Omaha, Neb.

"I object to what are called patent medicines, where maker alone knows what stuff is put in them, but I know the formula of your Castoria and advise its use in proper cases. I judge it to be a very useful, as well as harmless family medicine." N. B. SIKES, M. D., Brooklyn, N. Y.

Children Cry for Fletcher's Castoria.
In Use For Over 30 Years.

THE CASTORIA COMPANY, 77 HUNTER STREET, NEW YORK CITY.

War Declared on Rats, Mice and Roaches.

It has been scientifically demonstrated that rats are directly responsible for the spread of Bubonic Plague and other dreadful diseases, and it is the imperative duty of everyone to exterminate these pests by using **Stearns' Electric Rat and Roach Paste**. Used successfully during the past 35 years throughout the entire civilized world. It is ready for use, better than traps, and causes them to die like exterminators in powder form.

Government Departments and Boards of Public Health report their orders for thousands of boxes. Money back if it fails. Be sure to get the genuine. 2 oz. box 25c, 16 oz. box \$1.00. Sold by druggists everywhere.

(Continued from Page 1)

are now 130 members in the Japanese branch, making 1500 the total number of members to the Young Men's Christian Association of Honolulu, the biggest, most popular, and most progressive club in the city; all of these things because of its unselfish desire not to get but to give; not to be served, but to serve; an institution in which the rich man and the poor man meet on a common plane and find a common interest, and there are very few men who are not willing to be members of such an organization.

"201 new members on January 1st" is the campaign which will make that date famous. Campaigns of this kind have not only a value to the institution that promotes them but are valuable also in that they unite the men of the city in community efforts, mass movements, and the demonstration of the power of organization and co-operation. This will be the third time that the Young Men's Christian Association has conducted a campaign of this kind. Each time it has done so it has left the city more unified, strengthened, and more conscious of its possibilities.

Beginning at nine o'clock tomorrow morning the mercury in the big thermometer in front of the campaign headquarters at the office of the C. M. Cooke estate on Fort street below King, will start to rise rapidly toward the 201 mark. Each of the twelve Red and Blue teams, under the command of Captains George H. Angus and Emil A. Berndt, will start out at this time to canvass the entire city in the endeavor to secure two hundred and one or more new members to the association by six o'clock in the evening. With each Red and Blue team reporting the number of new members received hourly, there will be two reports at headquarters every five minutes. These returns will be posted on the two big bulletins, one of which will be in the window at headquarters, and the other in the window of the Office Supply Company, and at the same time, as each new member is reported, the mercury in the big thermometer will rise one degree.

The city has been divided into twelve districts, each of which will be canvassed by a Red and Blue team. Two flying squadrons in automobiles will visit the schools and the outlying districts of the city. Teams of boys will be working at Punahoa, McKinley High School, Central Grammar, and other schools, while two teams from the employed boys' department of the association under the leadership of Theodore Decker and Francis Soares, will endeavor to round up all the employed boys who are not members of the association.

Charles R. Frazier, who has had charge of the publicity end of the campaign, has at last divulged the secret of his "fly pup," which has been appearing in the display columns of the local newspapers for the past week. This morning the pup appeared as usual, but instead of having his eye on the fly, he was looking intently at "201 new members on January 10." Frazier's pup has been the cause of much wild guessing on the part of the "oldest inhabitants" and others, and the sale of headache powders has diminished alarmingly since the news is out. A. E. Larimer, who is the organizer of the campaign, has co-operated with Mr. Frazier in getting out some clever advertising.

A. H. Tarleton and Rev. A. A. Ebersole, who will be in charge of the campaign headquarters tomorrow, have done some excellent work on preliminary arrangements. They will receive from the captains of the two teams, each of whom will have a private telephone, the reports of the receiving of new members, and will post these reports on the bulletins, keeping the public informed at all times as to the progress of the campaign. Watch the blackboards at headquarters.

Ed Towse, chairman of the membership committee of the association, has had charge of the districting of the city and in soliciting members to serve on the twelve teams. C. F. Loomis and R. M. Cross have handled the boys' department end of the campaign in splendid shape, and George C. Banta has arranged attractive window displays of the Office Supply Company. J. A. Urice has handled the stenographic and mailing end of the campaign with a degree of alacrity which has been a big factor in the success of the undertaking; 3100 pieces of mail matter have been sent out in connection with the campaign, and a duplicate of 1000 prospective members has been prepared for the solicitors.

The members of the twelve teams will meet in Cooke Hall, association building, this evening for dinner, at which time they will receive their final instructions. The following men will compose the Red and Blue teams: Reds—George Angus, Capt.; C. R. Frazier, R. H. Trent, A. H. Jones, W. F. Gaynor, W. A. Love, G. H. Buttolph, John Anderson, Peter Tosh, Jack Milton, Ray Rietow, Harry Newcomb, C. Blacow, G. E. Smithies, F. E. Jarvis, George Bustard, Dr. W. C. Hobdy, Carl Nieper, William Wolters, J. E. Levinson, William Henry, Dr. D. D. Scudder, M. G. Johnston, C. H. Tracy, F. E. Steere, James A. Wilder, J. L. Fleming, Ed Benner, C. S. Davis and Mayor Fern; Blues—Emil A. Berndt, Capt.; F. C. Atherton, A. H. Donigero, C. J. Hunn, Willard Brown, C. S. Crane, C. H. Dickey, L. R. Killam, H. Gooding, Field, F. W. Ziegler, F. M. Lowery, C. G. Heiser, Jr., C. C. Clark, Trem Carr, G. H. Guild, W. A. Coombs, P. M. Pond, Albert Waterhouse, F. H. McNamara, W. P. Thomas, George C. Banta, Sidney R. Francis, F. A. Bechert, Ira D. P. Canfield, E. A. Mott-Smith, A. L. Howard, F. W. Wichman, A. L. C. Atkinson, B. F. Dillingham and Ed Dekum.

Everything in the printing line at Star-Bulletin, Alakea street; branch, Merchant street.

U. S. NAVY RANKS THIRD NOW AMONG NAVIES OF THE WORLD

Statistics of the relative strength of the navies of the world, corrected to Dec. 1 by the office of naval intelligence, have been made public. Contrary to the popular opinion that the United States navy ranks second only to that of Great Britain, the unemotional figures show that our completed tonnage is considerably less than that of Germany, and that when all authorized vessels are completed Germany's tonnage will be 1,124,257 as against our 898,345 tons. This is the result of a continuous building which Germany adopted a few years ago, while our naval construction has been haphazard.

For years the navy department has been asking Congress to establish the ranks of admiral and vice-admiral. At the time of the Jamestown exposition and the mobilization of an international fleet there it was feared that Hayti might send her one little gunboat with an admiral who would have taken precedence over Rear-Admiral Evans, then commanding our fleet. But Hayti did not send her admiral and other nations considerably dispatched officers whose rank was below that of the American officer.

The tabulation of the naval intelligence office shows that Great Britain has three admirals of the fleet, Germany two, and Japan one. Great Britain has twelve admirals, Germany four, and Japan seven. Great Britain leads with twenty-two vice admirals, Japan following with seventeen, France with fifteen, and Germany with thirteen. Of these three ranks the United States has but one, admiral Dewey, and the rank dies with him.

The table shows further how much under-officered the American navy is in comparison with other navies. Of captains and commanders we have

	Battlehips	Cruisers	Destroyers	Submarines	Torpedoboats	Coast Defense
England	16	40	7	34	73	140
Germany	10	20	3	9	38	119
United States	8	25	0	11	15	42
France	0	20	0	21	10	75
Japan	2	13	0	13	14	58
Russia	0	8	0	6	9	98
Italy	1	8	0	9	5	24
Austria	1	6	0	3	4	12

The following table shows what the number in each class will be when the vessels now under construction are completed:

	Battlehips	Cruisers	Destroyers	Submarines	Torpedoboats	Coast Defense
England	16	40	7	34	73	140
Germany	10	20	3	9	38	119
United States	8	25	0	11	15	42
France	0	20	0	21	10	75
Japan	2	13	0	13	14	58
Russia	0	8	0	6	9	98
Italy	1	8	0	9	5	24
Austria	1	6	0	3	4	12

These tables do not include the following vessels: Ships over twenty years old from date of launch, unless they have been reconstructed and re-armed within five years; torpedo craft over fifteen years old; those not actually begun or ordered, although authorized; transports, colliers, repair ships, torpedo depot ships, or other auxiliaries; vessels of less than 1,500 tons, except torpedo craft and torpedo craft of less than fifty tons.

BRITISH METHODS SEVERELY CRITICISED

Discussing the relative merits of British and German trading methods in Southern China, the South China Daily News, an English newspaper published at Hongkong, is very sarcastic at the expense of the Britisher, whose conservatism in matters of foreign commerce has often been the subject of pointed comment.

"Chuckle as we may over our commercial supremacy in certain quarters," observes the newspaper named, "we are forced to acknowledge that the development of our export trade cannot compare with that of our Teutonic friends. In every part of the East, at any rate, the fact is too eloquent and convincing to need close scrutiny, and merchants and agents in Hongkong could many a tale unfold of what quaint views are entertained at home by untraveled men—ignorant of the conditions—as to the needs of the Orient. Then, again, the slackness which characterizes some of the subordinate officials in British houses, entrusted with urgent orders, would at times make the angels weep." The manufacturers of the old-country will bear the test today as they have done for years in the open markets of the world, but there is a decided tendency on the part of merchants to foist unsuitable goods on a market of which they have no knowledge, to be anything but generous in placing their samples before customers and thus cultivating business, and to create a host of petty, irritating points which cannot foster confidence or trade. The British manufacturer has to realize that he has strong and astute competitors in the field today, and the greatest care must be taken in the dispatch of goods which command a sale and the approval of customers."

COLDS CAUSE HEADACHE

LAXATIVE BROMO-QUININE, removes the cause. Used the world over to cure a cold in one day. E. W. GROVES' signature on each box. Made by PARKS MEDICINE CO., Saint Louis, U. S. A.

only 214, as against 664 of Great Britain, 540 of France, 337 of Germany and 292 of Japan. Of other line officers Great Britain has 2,277, Japan 1,818, Germany 1,782, France 1,457. This country comes last with 1,477.

Naval experts contend that for every battleship that sets out to meet an enemy there should be four accompanying destroyers to afford adequate protection against the torpedo destroyer or submarine attack. Our navy officers have repeatedly urged that four destroyers should be authorized with every battleship, but the tables show that while we have eight dreadnoughts and twenty-five battleships, we have only forty-two destroyers, as against 140 of Great Britain, 119 of Germany, 75 of France, 98 of Russia and 58 of Japan.

The present order of naval tonnage is shown in the following table:

Nation	Tonnage
Great Britain	1,978,210
Germany	837,982
United States	773,107
France	630,769
Japan	471,558
Russia	286,930
Italy	224,837
Austria	178,149

When the vessels now building are completed the relative order will be as follows:

Nation	Tonnage
Great Britain	2,478,152
Germany	1,124,257
United States	898,345
France	806,729
Japan	618,724
Russia	459,207
Italy	416,310
Austria	260,751

This table shows the number of vessels of each class now possessed by the various powers:

	Battlehips	Cruisers	Destroyers	Submarines	Torpedoboats	Coast Defense
England	16	40	7	34	73	140
Germany	10	20	3	9	38	119
United States	8	25	0	11	15	42
France	0	20	0	21	10	75
Japan	2	13	0	13	14	58
Russia	0	8	0	6	9	98
Italy	1	8	0	9	5	24
Austria	1	6	0	3	4	12

NAGEL'S VIEWS ON REGULATION

Something in the nature of a reaction against recent tendencies in federal legislation is apparent in certain views expressed by Secretary Nagel at his annual report, as head of the department of commerce and labor. He strongly advises that the proposed federal commission to regulate industrial corporations, if finally created by congress, should not be endowed with powers equal to those exercised by the Interstate Commerce Commission over railroads, and in particular he disapproves the suggestion that the commission should have authority to fix the prices of commodities. Instead of pressing federal regulation as far as possible, the Secretary says, the real desideratum in legislation affecting the country's business should be to preserve to the greatest extent, consistent with the public welfare, the element of self-regulation. In order to make the work of the Bureau of Corporations more effective and to pave the way for constructive legislation regulating business, Mr. Nagel urges that Congress should provide for the automatic submission by corporations engaged in interstate commerce of fundamental data, such as facts relating to capitalization, property, business, investments, profits, officers, directors and controlling interests. He suggests that such information, subject to due protection against unnecessarily disclosing matters of no real public concern, would permit more prompt publicity than is possible under the present method of laborious investigation in each specific case. He also recommends that the Bureau of Corporations should act in an advisory capacity to the federal courts in formulating plans for the reorganization of corporations found to be in violation of the Sherman anti-trust law—Bridgman.

CIVIC MEETING TO BE HELD IN NEW LIBRARY

The first educational meeting for the general public on the subject of municipal government is to be held in the hall of the new public library next Tuesday evening, under the auspices of the civic federation. The features of the proposed commission, or short ballot municipal system will be one of the principal topics, but it is expected that public utilities commissions and protection for workmen will also come in for a share of discussion. Incidentally, this will be the public's first opportunity to inspect the new library building, and the hall, which will seat 200 persons comfortably, probably will be filled to capacity by citizens who want to see what the interior of this handsome edifice looks like.

Prof. W. A. Bryan of the College of Hawaii, Senator C. H. Dickey and Ed Towse are to read papers on the various topics already suggested, and open discussion of these subjects will be invited.
